# Featured Cam Locks of The Month

## Get 5% Off These Products

**SlamCAM converts CompX National cam locks into self-locking — just close the door or drawer.**

Two unique features in one package: self-locking and a spring-loaded latch.

True convenience — release the key, and the self-locking component automatically returns the lock, along with SlamCAM, to the locked position.

Retrofits CompX National cam locks C8051 through C8075

Helps eliminate security concerns; slam the door and it's locked

### SlamCAM — spring loaded latch

Replacing steel cams with SlamCAM eliminates steel cams that crash into furniture or strikes while in the latched position. Bent cams can cause locks not to secure properly or secure at all.

### Self-locking

The self-locking feature uses spring tension to conveniently return the lock to the locked position. User turns the key to the open position and opens the door or drawer. Upon releasing the key, the self-locking component returns the lock along with SlamCAM to the locked position; user simply closes the door or drawer — no need to turn the lock back to the locked position.
